

Fact Sheet

Fulfillment by SCG Logistics

"One Stop Logistics Solution" by "Fulfillment by SCG Logistics" enables online sellers to scale up their business with inventory management, packing and delivery services for items of all sizes ranging from small packages, e.g. cosmetic products to large items, e.g. electronic appliance or furniture. Furthermore, the solution also offers Value Added Services that can satisfy unique consumer needs which include customization services such as adding card or gift wrapping prior the delivery, White Glove service for shipping and installing delicate high-value product that requires special care such as electronic appliance or furniture, Reverse Logistics service for handling product returns and repairs, and Data Analytics to provide valuable insights of consumer behaviors to help further business more effectively. Customers can track storing inventory and item status via an online platform.

Technologies For Better Operational Performance

- Micro Rack, the three-story storage rack suitable for small-sized items, storing up to 1,500 cubic meters.
- Conveyor used to substitute human operators that transfer items from the storage location to Packing Station, preparing for the delivery.
- WMS (Warehouse Management System) and Barcode Scanner are implemented to prevent picking errors.
